The Devereux Early Childhood Assessment (DECA-P2) Preschool Program, Second Edition is a strength-based system designed to promote resilience in children ages 3-5. Through the program, early childhood professionals and families learn specific strategies to support young children’s social and emotional development, thus enhancing the overall quality of early childhood programs.

### Head Start Performance Standards

<table>
<thead>
<tr>
<th>1304.20 (b) (1) (b)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screening for developmental, sensory, and behavioral concerns. (1) In collaboration with each child’s parent, and within 45 calendar days of the child’s entry into the program, grantees and delegate agencies must perform or obtain linguistically and age-appropriate screening procedures to identify concerns regarding a child’s developmental, sensory (visual and auditory), behavioral, motor, language, social, cognitive, perceptual and emotional skills (see 45 CFR 1308.6 (b) (3) for additional information). To the greatest extent possible, these screening procedures must be sensitive to the child’s cultural background.</td>
</tr>
</tbody>
</table>

### Devereux Early Childhood Assessment (DECA-P2) Preschool Program

<table>
<thead>
<tr>
<th>1304.20 (b) (2) (2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The DECA-P2 is a standardized, valid and reliable instrument for children ages 3-5 that measures child protective factors as well as screens for behavioral concerns. The DECA, to be completed by both staff and parents, provides a tool to better understand a child’s behavioral and social strengths and needs as well as determine when further assessment is necessary.</td>
</tr>
</tbody>
</table>

Having been normed on a representative sample of children in the United States, the instrument is sensitive to children’s cultural backgrounds. The instrument is available in English and Spanish. Requests for versions in other languages should be forwarded to Devereux, see contact information at the end of this document.

### 1304.20 (e) (3) (3)
Talk with parents about how to familiarize their children in a developmentally appropriate way and in advance about all of the procedures they will receive while enrolled in the program;

Promoting Resilience For Now and Forever: A family guide to support social and emotional development, offers parents information about appropriate social and emotional development. The parent guide is easy-to-read, written on a 5th-grade reading level, and offers specific suggestions for parents to encourage their child’s development.

### 1304.20 (f) (1) (f)
Individualization of the program.

(1) Grantee and delegate agencies must use the information from the screenings for developmental, sensory, and behavioral concerns, the ongoing observations, medical and dental evaluations and treatments, and insights from the child’s parents to help staff and parents determine how the program can best respond to each child’s individual characteristics, strengths and needs.

The DECA Preschool Program is a strength-based system that incorporates insight from parents and classroom staff regarding every child’s social and emotional strengths and concerns. This information is gathered from multiple sources including assessment and observation, and is used for daily and weekly planning to meet children's individual needs.

### 1304.21 (a) (1) (iii) (iii)
Provide an environment of acceptance that supports and respects gender, culture, language, ethnicity and family composition;

The Promoting Resilience in Preschoolers is another DECA Preschool Program resource. Five chapters are devoted to implementing teaching practices that promote children's social and emotional health and resilience. Through a developmentally appropriate environment, specific strategies are offered for encouraging Initiative, Self-Regulation, and Attachment/Relationships in individual children and groups of children.

### 1304.21 (a) (1) (iv) (iv)
Provide a balanced daily program of child-initiated and adult-directed activities, including individual and small group activities; and

The classroom guide contains a chapter specifically devoted to using activities and experiences to promote resilience in children. Through developmentally appropriate activities and experiences, specific strategies are offered for encouraging Initiative, Self-Regulation, and Attachment/Relationships in individual children and groups of children.

### 1304.21 (a) (2) (ii)
The DECA Preschool Program is supported
(ii) Provide opportunities to increase their child observation skills and to share assessments with staff that will help plan the learning experiences; by observations that are accurate, objective and complete. Children and staff will both benefit from these quality observations and insights into children's behaviors, strengths, likes and dislikes. Training for the DECA Preschool Program includes an intensive module on improving child observation skills.

---

The classroom guide contains a chapter that focuses on the daily program. Through a developmentally appropriate daily routines, specific strategies are offered for encouraging Initiative, Self-Regulation, and Attachment/Relationships in individual children and groups of children.

The classroom guide offers strategies to guide teachers in how they will allow children to learn and develop through play and positive interactions with adults and other children.

The focus of the DECA Preschool Program is to promote healthy social and emotional development in children and to help foster resilience. The classroom guide offers strategies that are specifically designed to help children develop healthy attachment/relationships, an important factor in a child’s development of emotional security.

The classroom guide offers guidance that will help teachers understand the importance of children developing sense-of-self, as well as specific strategies to foster this growth. Opportunities are discussed to allow children to explore and express their feelings, as well as experience a sense of belonging, both in small-group and large-group activities.

In the DECA Preschool Program, individual child observations and classroom observations are encouraged throughout the program year. Results are used to plan for...

</tr>
</tbody>
</table>

| (v) Helping parents to better understand mental health issues | assist parents in learning about and promoting children's resilience. With teacher's involvement in the DECA Preschool Program, staff will be better prepared to discuss these sensitive mental health issues with parents. |

Through a culturally competent approach, the Devereux model emphasizes to staff the importance of communicating with parents about mental health issues and providing parents with information about partnering with staff and other mental health resources to promote children's social and emotional development. Regularly scheduled family activities are strongly encouraged in the Devereux model.

The DECA Preschool Program may be used as one source of information to recommend the referral of a child to a mental health specialist. The model also provides electronic access to an early childhood/mental health specialist. This access will provide support to the staff until an on-site mental health professional is available. In addition, the electronic technical assistance will guide staff and parents in their efforts to secure the assistance of a mental health professional in their community.

The Devereux model supports and enhances regularly scheduled on-site mental health consultation.

The DECA-P2 produces two types of profiles, an individual profile and a classroom profile. Based on these profiles generated by the assessment, teachers implement strategies that are specifically geared to address the needs of the individual child as well as the entire class. Item-level analysis offers valuable insight that will help teachers and families determine the most

### 1304.41 (a) (2) (ii) (vii) & (viii)
Grantee and delegate agencies must take affirmative steps to establish ongoing collaborative relationships with community organizations to promote the access of children and families to community services that are responsive to their needs, and to ensure that Early Head Start and Head Start programs respond to community needs, including:
(ii) Mental health providers.
(vii) Local elementary schools and other educational and cultural institutions, such as libraries and museums, for both children and families;
(viii) Providers of child care services

Communication will be facilitated by the results of this standardized, reliable, and valid, strength-based assessment. Results may be shared, as needed, and with parental permission, with other community agencies involved in planning and supporting the child and his or her family. Child care staff, elementary school personnel, and mental health providers may choose to use DECA-P2 results to support the growing strengths of the child. The opportunity for consistency across programs is increased.

### 1304.52 (I)
Grantee and delegate agencies must, at a minimum, perform annual performance reviews of each Early Head Start and Head Start staff member and use the results of these reviews to identify staff training and professional needs, modify staff performance agreements, as necessary, and assist each staff member in improving his or her skills and professional competencies.

One of the essential sets of DECA Program forms, the Reflective Checklists, help administrative staff to assess the developmental appropriateness of classroom environments, daily programs, activities and experiences, caring connections, and partnerships with families. By administrators and teachers completing the Reflective Checklists for Teaching Practices together, communication and facilitation of professional growth are fostered.

### 1304.52 (j) (3)
Grantee and delegate agencies must make mental health and wellness information available to staff with concerns that may affect their job performance.

Participation in the DECA Preschool Program provides the unique opportunity for staff to reflect on their own protective factors. Being aware of their own strengths and concerns can help staff become more mentally healthy and thus reflect a more positive and nurturing environment for children.

### 1304.53 (a) (1) & (3)
(1) Grantee and delegate agencies must provide a physical environment and facilities conducive to learning and reflective of the different stages of development of each child.
(3) The center space provided by grantee

An entire chapter devoted to environment will serve as a vital reference to classroom and administrative personnel. Through a developmentally appropriate environment, specific strategies are offered for encouraging Initiative, Self-Regulation, and Attachment/Relationships in individual
and delegate agencies must be organized into functional areas that can be recognized by the children and that allow for individual activities and social interactions.

<tbody>
<tr>
<td>The disabilities coordinator must be involved with other program staff throughout the full process of assessment of children, which has three steps:</td>
</tr>
<tr>
<td>(1) All children enrolled in Head Start are screened as the first step in the assessment process;</td>
</tr>
<tr>
<td>(2) Staff also carry out on-going developmental assessment for all enrolled children throughout the year to determine progress and plan program activities.</td>
</tr>
</tbody>
</table>
with other instruments that assess social and emotional health. It is a tool to help identify children early in order to prevent future social and emotional problems.

<table>
<thead>
<tr>
<th>1308.6 (d)</th>
<th>Developmental assessment, the second step, is the collecting of information on each child's functioning in these areas: gross and fine motor, perceptual discrimination, cognition, attention skills, self-help, social and receptive skills, and expressive language.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1308.8 (a) &amp; (b)</td>
<td>(a) An emotional/behavioral disorder is a condition in which a child's behavioral or emotional responses are so different from those of the generally accepted, age-appropriate norms of children with the same ethnic or cultural background as to result in significant impairment in social relationships, self-care, educational progress or classroom behavior. (b) The eligibility decision must be based on multiple sources of data, including assessment of the child’s behavioral or emotional functioning in multiple settings.</td>
</tr>
<tr>
<td>1308.19(d) &amp; (e)</td>
<td>(d) If Head Start develops the IEP, the IEP must take into consideration the child's unique needs, strengths, developmental potential and the family strengths and circumstances as well as their child's disabilities. (e) The IEP must include: (1) A statement about the child's present level of functioning in the social-emotional, motor, communication, self-help, and cognitive areas of development, and the identification of needs in those areas requiring specific programming.</td>
</tr>
<tr>
<td>1308.19 (j) (2)</td>
<td>The DECA Preschool Program strongly utilizes the DECA-P2 as one source of information, in addition to information gathered through quality observations and other sources, will contribute to the decision for referral for further evaluation. The DECA-Clinical version (or DECA-C) serves as a follow-up assessment for children scoring in the concern range on the DECA-P2 behavioral concerns screener.</td>
</tr>
<tr>
<td></td>
<td>The strength-based assessment tool, the DECA-P2, will provide information regarding a child’s strengths in the areas of Initiative, Self-Regulation, and Attachment/Relationships. This information will be key in planning for children who have been identified as children with special needs.</td>
</tr>
</tbody>
</table>

The DECA Preschool Program strongly
Grantee and their delegates must make vigorous efforts to involve parents in the IEP process. The grantee must:
(2) make every effort to assure that parents understand the purpose and proceedings and that they are encouraged to provide information about their child and their desires for the child’s program;

encourages programs to include parents as a key part of the planning team for all children, including children for whom an IEP has been developed.
