

Devereux Adult Resilience Survey

AN INTRODUCTION

Thank you for your interest in the Devereux Adult Resilience Survey.

Authored by Mary Mackrain, the Devereux Adult Resilience Survey (DARS) is a 23-item reflective checklist that provides adults with information about their personal strengths. The information can be used to help individuals build on these strength, such as creativity and setting limits, so that they can better cope with adversity and the stresses of daily life.

Statistical analysis shows that the DARS is an excellent tool for providing adults with an opportunity to gain valuable insights, particularly in these four areas:

Relationships: The mutual, long-lasting back-and-forth bond we have with another person in our lives.

Internal Beliefs: The feelings and thoughts we have about ourselves and our lives, and how effective we think we are at taking action in life.

Initiative: The ability to make positive choices and decisions and act upon them.

Self-Control: The ability to experience a range of feelings, and express them using the words and actions society considers appropriate.

The purpose of the DARS is not to compare individual's scores to the population, but to give adults, more specifically teachers, the opportunity to become aware of personal strengths and areas of need. Upon completion of the Devereux Adult Resilience Survey, individuals are encouraged to use the Building Your Bounce: Simple Strategies for a Resilient You Adult Journal. This journal provides suggested strategies for strengthening adults' protective factors shown to support resilience.

It takes a fair amount of reflection and practice to change any negative thoughts we might have and to integrate new behaviors that are good for us. You are worth it. Even if you are already a strong, happy person you will want to continue building yourself up to maintain or increase your level of well-being.

Best wishes on your personal journey.
